# California Housing - Final Project

## User Documentation

### **How to Open:**

- Open “map.html” with Firefox ONLY (Tested on Firefox 65.0.1). Access to XMLHttpRequest not supported with Google Chrome.

### **Features:**

- Data Selection
  - State-Level Tab
    - Choose which data to consider. The values of data will be added as weights for the heatmap display.
    - Select Overlay option. So far only one display type is available.
    - Click “Go!” button to see results on map.
  - County-Level
    - Select which county you are interested in via clicking on the map or via the index tab.
    - Click “Display Stats”, “Display Markers”, or “Clear Selection” to see results.
  - Index
    - The index tab will list all the counties. Clicking on a county when select that county on the map. Selected counties will be highlighted. Multi Select is supported by holding down control/command key on PC/Mac respectively.

### **How to Resolve Common Problems:**

- Refresh page to resolve most issues. Sometimes web browser will not read/load the dataset .json files. Continue refreshing if issues persist.
